

Communicative rotary actuator fail-safe for adjusting dampers in technical building installations

- Air damper size up to approx. 4 m²
- Torque motor 20 Nm
- Nominal voltage AC/DC 24 V
- Control modulating, communicative 2...10 V variable
- Position feedback 2...10 V variable
- Conversion of sensor signals
- Communication via Belimo MP-Bus

Technical data

Electrical data	Nominal voltage	AC/DC 24 V		
	Nominal voltage frequency	50/60 Hz		
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V		
	Power consumption in operation	8.5 W		
	Power consumption in rest position	3.5 W		
	Power consumption for wire sizing	11 VA		
	Connection supply / control	Cable 1 m, 4 x 0.75 mm ²		
	Parallel operation	Yes (note the performance data)		
Functional data	Torque motor	20 Nm		
	 Torque fail-safe	20 Nm		
	Communicative control	MP-Bus		
	Operating range Y	210 V		
	Input Impedance	100 kΩ		
	Operating range Y variable	Start point 0.530 V		
	1 5 5	End point 2.532 V		
	Options positioning signal	Open/close		
		3-point (AC only)		
		Modulating (DC 032 V)		
	Position feedback U	210 V		
	Position feedback U note	Max. 0.5 mA		
	Position feedback U variable	Start point 0.58 V		
		End point 2.510 V		
	Position accuracy	±5%		
	Direction of motion motor	selectable with switch L/R		
	Direction of motion variable	electronically reversible		
	Direction of motion fail-safe	selectable by mounting L/R		
	Manual override	by means of hand crank and locking switch		
	Angle of rotation	Max. 95°		
	Angle of rotation note	adjustable starting at 33% in 2.5% steps (with mechanical end stop)		
	Running time motor	150 s / 90°		
	Running time motor variable	70220 s		
	Running time fail-safe	<20 s @ -2050°C / <60 s @ -30°C		
	Adaptation setting range	manual		
	Adaptation setting range variable	No action		
		Adaptation when switched on		
		Adaptation after using the hand crank		
	Override control	MAX (maximum position) = 100%		
		MIN (minimum position) = 0%		
		ZS (intermediate position, AC only) = 50%

Technical data sheet

SF24A-MP

nctional data	Override control variable	MAX = (MIN + 32%)100% MIN = 0%(MAX – 32%) ZS = MINMAX			
	Sound power level, motor	40 dB(A)			
	Mechanical interface	Universal shaft clamp 1025.4 mm			
	Position indication	Mechanical			
	Service life	Min. 60'000 fail-safe positions			
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)			
	Power source UL	Class 2 Supply			
	Degree of protection IEC/EN	IP54			
	Degree of protection NEMA/UL	NEMA 2			
	Enclosure	UL Enclosure Type 2			
	EMC	CE according to 2014/30/EU			
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14			
	Certification UL	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1			
		The UL marking on the actuator depends on the production site, the device is UL-compliant in any case			
	Mode of operation	Туре 1.АА			
	Rated impulse voltage supply / control	0.8 kV			
	Pollution degree	3			
	Ambient temperature	-3050°C			
	Storage temperature	-4080°C			
	Ambient humidity	Max. 95% RH, non-condensing			
	Servicing	maintenance-free			
Weight	Weight	2.2 kg			

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- · Cables must not be removed from the device.

Product features

Mode of operation Conventional operation:

The actuator is connected with a standard modulating signal of 0...10 V and drives to the position defined by the positioning signal. Measuring voltage U serves for the electrical display of the damper position 0.5...100% and as slave control signal for other actuators.

Operation on Bus:

The actuator receives its digital positioning signal from the higher level controller via the MP-Bus and drives to the position defined. Connection U serves as communication interface and does not supply an analogue measuring voltage.

Converter for sensors	Connection option for a sensor (passive or active sensor or switching contact). The MP actuator serves as an analogue/digital converter for the transmission of the sensor signal via MP-Bus to the higher level system.
Parametrisable actuators	The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.
Simple direct mounting	Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti- rotation device to prevent the actuator from rotating.
Manual override	By using the hand crank the damper can be actuated manually and engaged with the locking switch at any position. Unlocking is carried out manually or automatically by applying the operating voltage.
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Home position	The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%).
	The actuator then moves into the position defined by the positioning signal.
Adaptation and synchronisation	An adaptation can be triggered manually by pressing the "Adaptation" button or with the PC- Tool. Both mechanical end stops are detected during the adaptation (entire setting range). Automatic synchronisation after actuating the hand crank is programmed. The synchronisation is in the home position (0%).
	The actuator then moves into the position defined by the positioning signal.
	A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Accessories

Gateways	Description	Туре
	Gateway MP zu BACnet MS/TP	UK24BAC
	Gateway MP to Modbus RTU	UK24MOD

	Connection cable 5 m, A: RJ11 6/4 ZTH EU, B: free wire end for connection to MP/PP terminal	ZK2-GEN

Parallel connection of other actuators possible. Observe the performance data.

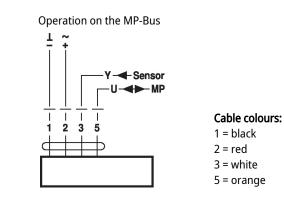

Electrical installation

Supply from isolating transformer.

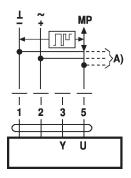

Cable colours: 1 = black 2 = red 3 = white 5 = orange

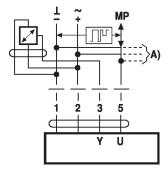

Functions

Functions when operated on MP-Bus Connection on the MP-Bus

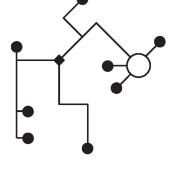

Connection of active sensors

A) additional MP-Bus nodes (max. 8)

A) additional MP-Bus nodes (max. 8)

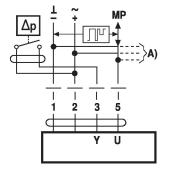

- Supply AC/DC 24 V • Output signal DC 0...10 V
- (max. DC 0...32 V)
- Resolution 30 mV

MP-Bus Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted). Supply and communication in one and the same 3-wire cable • no shielding or twisting necessary • no terminating resistors required

Connection of external switching contact

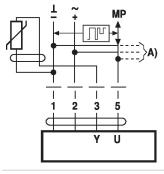

A) additional MP-Bus nodes (max. 8) Switching current 16 mA @ 24

٧ • Start point of the operating range must be parametrised on the MP actuator as $\geq 0.5 \text{ V}$

Connection of passive sensors

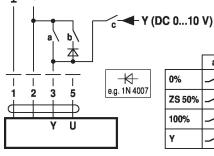

Ni1000	–28+98°C	8501600 Ω ²⁾
PT1000	–35+155°C	8501600 Ω ²⁾
NTC	-10+160°C ¹⁾	200 Ω60 kΩ ²⁾

A) additional MP-Bus nodes (max. 8) 1) Depending on the type 2) Resolution 1 Ohm Compensation of the measured value is recommended

Functions with basic values (conventional mode)

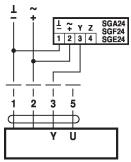

Override control with AC 24 V with relay contacts Т

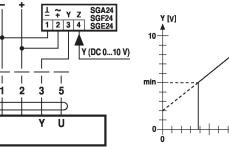

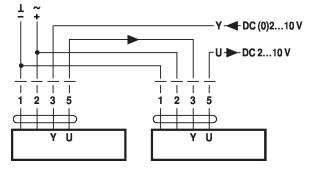

Minimum limit with positioner SG..

Control remotely 0...100% with positioner SG..

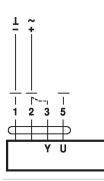

Follow-up control (position-dependent)

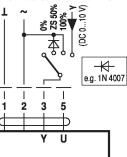

Functional check

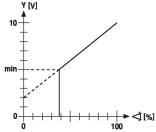

Procedure

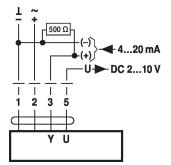

1. Connect 24 V to connections 1 and 2 2. Disconnect connection 3: - with direction of rotation 0: Actuator rotates to the left - with direction of rotation 1: Actuator rotates to the right 3. Short-circuit connections 2 and 3: - Actuator runs in opposite direction

Override control with AC 24 V with rotary switch

Control with 4...20 mA via external resistor

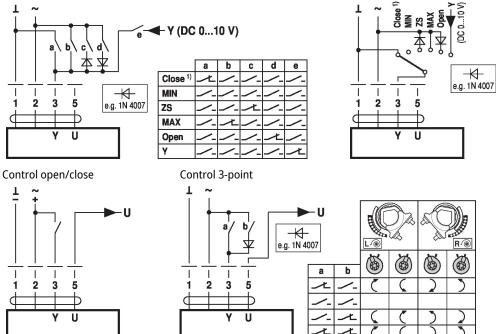

Caution:

The operating range must be set to DC 2...10 V. The 500 Ω resistor converts the 4...20 mA current signal to a voltage signal DC 2...10 V

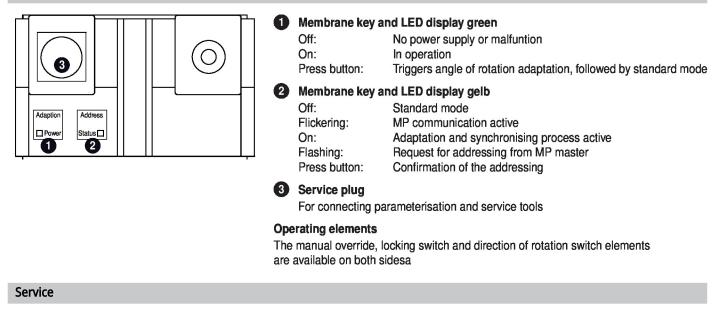

Functions for actuators with specific parameters (Parametrisation necessary)

Override control and limiting with AC 24 V with relay contacts Override control and limiting with AC 24 V with rotary switch

1) **Caution:** This function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

Service tools connection The actuator can be parametrised by ZTH EU via the service socket.

For an extended parametrisation the PC tool can be connected.

Connection ZTH EU / PC-Tool
