

## **Butterfly valve with Lug types**

- For open and closed cold and warm water systems
- For switching heat generators or cooling machines on/off

Type overview				
Туре	DN	kvmax [m³/h]	kvs [m³/h]	PN
D625NL	25	50	24	10 / 16
D632NL	32	55	25	10 / 16
D640NL	40	65	27	10 / 16
D650NL	50	100	30	10 / 16
D665NL	65	170	50	10 / 16
D680NL	80	260	75	10 / 16
D6100NL	100	520	150	10 / 16
D6125NL	125	880	260	10 / 16
D6150NL	150	1400	400	10 / 16
D6350NL	350	10300	3010	16
D6400NL	400	14200	4140	16
D6450NL	450	18800	5490	16
D6500NL	500	24100	7060	16
D6600NL	600	37300	10900	16
D6700NL	700	42800	11760	16

The types D6200NL, D6250NL and D6300NL have been replaced by the types D6200WL, D6250WL and D6300WL. For technical data please check the datasheet D6..WL.

## **Technical data**

Functional data	Fluid	Cold and warm water, water with glycol up to max. 50% vol.
	Fluid temperature	-20120°C
	Flow characteristic	060% opening angle: equal percentage 0100% opening angle: S-form
	Flow characteristic note	0100% opening angle: linear (only with PR BAC actuator)
		For butterfly valves with PRBAC actuator, the flow characteristic can be parametrised to equal percentage or linear using the Belimo Assistant App.
	Leakage rate	tight, leakage rate A (EN 12266-1)
	Angle of rotation	90°
	Installation position	upright to horizontal (in relation to the stem)
	Suitable connection flange	In accordance with ISO 7005-2 and EN 1092-2
	Servicing	maintenance-free
Materials	Valve body	EN-GJS-400-15 (GGG 40)
	Body finish	polyester powder coated
	Closing element	Stainless steel AISI 304 (1.4301)

	Technical data sheet	D6NL
i	Spindle	Stainless steel AISI 420 (1.4021) (DN 25, 32, 40, 50, 65, 80, 100, 125, 150)
		Stainless steel AISI 630 (1.4542) (DN 350, 400,
	Spindle seal	450, 500, 600, 700) EPDM O-ring

RPTFE EPDM

### Safety notes

Materials

Spindle bearing

Seat

- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- The valve may not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.
- The damper must be opened and closed slowly in order to avoid hydronic shocks in the pipe system.

### **Product features**

#### Mode of operation

The butterfly valve is opened or closed completely by an open/close rotary actuator. Continuous rotary actuators are connected by a commercially available controller and move the valve to any position desired. The valve disk made of stainless steel is pressed into the soft-sealing EPDM seat by a rotary movement and ensures leakage rate A (tight). The pressure losses are slight in the open position and the kv value is at a maximum.

### Manual override

Manual throttling or isolation can be carried out with a lever or a worm gear (see «Accessories»).

-With lever (DN 25...150): Adjustable in 10 ratchet steps with position indication (  $0 = 0^{\circ}$  (angle);  $9 = 90^{\circ}$  (angle) )

-With worm gear (DN 25...700): steplessly adjustable (self-locking) with position indication.

### Accessories

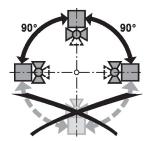

Electrical accessories	Description	Туре
	Stem heater flange F05 (30 W)	ZR24-F05
Mechanical accessories	Description	Туре
	Worm gear for butterfly valves DN 25100	ZD6N-S100
	Lever for butterfly valves DN 25100	ZD6N-H100
	Worm gear for butterfly valves DN 125300	ZD6N-S150
	Lever for butterfly valves DN 125150	ZD6N-H150
	Worm gear for butterfly valves DN 350	ZD6N-S350
	Worm gear for butterfly valves DN 400	ZD6N-S400
	Worm gear for butterfly valves DN 450	ZD6N-S450
	Worm gear for butterfly valves DN 500	ZD6N-S500
	Worm gear for butterfly valves DN 600	ZD6N-S600
	Worm gear for butterfly valves DN 700	ZD6N-S700

#### **Installation notes**

#### **Recommended installation positions**

The butterfly valves may be mounted upright to horizontal. The butterfly valves may not be installed in a hanging position i.e. with the spindle pointing downwards.

Water quality requirements

The water quality requirements specified in VDI 2035 must be adhered to.

#### Spindle heater

In cold water applications and warm humid ambient air can cause condensation in the actuators. This can lead to corrosion in the gear box of the actuator and causes a breakdown of it. In such applications, the use of a spindle heater is provided.

The spindle heater must be enabled only when the system is in operation, because it does not have temperature control.

#### Servicing

Butterfly valves and rotary actuators are maintenance-free.

Before any service work on the final controlling device is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level).

The system must not be returned to service until the butterfly valve and the rotary actuator have been reassembled correctly in accordance with the instructions and the pipeline has been refilled by professionally trained personnel.

To avoid a torque increase during off season shut down, exercise the butterfly valve (full open and close) at least once a month.

#### Flow setting

The Belimo butterfly valves have an approximate equal percentage characteristic curve between 0...60% opening angle.

The following table shows the respective kv values in relation to the opening angle (%).

		10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
DN 25	kv (m3/h)	0.1	2	6	10	15	24	36	46	48	50
