

Configurable globe valve actuator for 2-way and 3-way globe valves

- Actuating force 2500 N
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V variable
- Stroke 40 mm

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	11 W
	Power consumption in rest position	1.5 W
	Power consumption for wire sizing	18 VA
	Connection supply / control	Cable 1 m, 4 x 0.75 mm ²
	Parallel operation	Yes (note the performance data)
Functional data	Actuating force motor	2500 N
	Operating range Y	210 V
	Input Impedance	100 kΩ
	Operating range Y variable	Start point 0.530 V
		End point 2.532 V
	Options positioning signal	Open/close
		3-point (AC only)
	Design for the dell	Modulating (DC 032 V)
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	Start point 0.58 V End point 2.510 V
	Position accuracy	±5%
	Manual override	with push-button, can be locked
	Stroke	40 mm
		35 s / 40 mm
	Running time motor	
	Running time motor variable	3590 s
	Adaptation setting range	manual (automatic on first power-up)
	Adaptation setting range variable	No action Adaptation when switched on
		Adaptation after pushing the gear
		disengagement button
	Override control	MAX (maximum position) = 100%
		MIN (minimum position) = 0%
		ZS (intermediate position, AC only) = 50%
	Override control variable	MAX = (MIN + 33%)100% ZS = MINMAX
	Sound power level, motor	65 dB(A)
	Position indication	Mechanically, 540 mm stroke
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Power source UL	Class 2 Supply
	Degree of protection IEC/EN	IP54
	Degree of protection NEMA/UL	NEMA 2

Technical data sheet		EVC24A-MF
Enclosure	UL Enclosui	re Type 2
EMC	CE accordin	ng to 2014/30/EU
Certification IEC/EN	IEC/EN 607	30-1 and IEC/EN 60730-2-14
Certification UL	and CAN/CS The UL mar	rding to UL60730-1A, UL60730-2-14 SA E60730-1 king on the actuator depends on tion site, the device is UL-compliant
Mode of operation	Type 1	
Rated impulse voltage supply / control	0.8 kV	
Pollution degree	3	
Ambient temperature	050°C	
Storage temperature	-4080°C

Weight 3.7 kg

Safety notes

 This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.

Max. 95% RH, non-condensing

maintenance-free

- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or
 aggressive gases interfere directly with the device and that it is ensured that the ambient
 conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The switch for changing the direction of motion and so the closing point may be adjusted only
 by authorised specialists. The direction of motion is critical, particularly in connection with
 frost protection circuits.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation

The actuator is connected with a standard modulating signal of 0...10 V and drives to the position defined by the control signal. The measuring voltage U serves for the electrical display of the actuator position 0.5...100% and as control signal for other actuators.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.

Simple direct mounting

Simple direct mounting on the globe valve by means of form-fit hollow clamping jaws. The actuator can be rotated by 360° on the valve neck.

Manual override

Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).

The stroke can be adjusted by using a hexagon socket screw key (5 mm), which is inserted into the top of the actuator. The stem extends when the key is rotated clockwise.

High functional reliability

The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Home position

Factory setting: Actuator stem is retracted.

When valve-actuator combinations are shipped, the direction of motion is set in accordance with the closing point of the valve.

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out an adaptation, which is when the operating range and position feedback adjust themselves to the mechanical setting range.

The actuator then moves into the position defined by the positioning signal.

Adaptation and synchronisation

An adaptation can be triggered manually by pressing the "Adaptation" button or with the PCTool. Both mechanical end stops are detected during the adaptation (entire setting range).

Automatic synchronisation after pressing the gearbox disengagement button is configured. The

synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Setting direction of motion When actuated, the stroke direction switch changes the running direction in normal operation.

Accessories

Electrical accessories	Description	Туре
	Auxiliary switch 2 x SPDT add-on	S2A-H
Service tools	Description	Туре
	Service Tool, with ZIP-USB function, for parametrisable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH EU
	Belimo PC-Tool, Software for adjustments and diagnostics	MFT-P
	Adapter for Service-Tool ZTH	MFT-C
	Connection cable 5 m, A: RJ11 6/4 ZTH EU, B: 6-pin for connection to service socket	ZK1-GEN
	Connection cable 5 m, A: RJ11 6/4 ZTH EU, B: free wire end for connection to MP/PP terminal	ZK2-GEN

Electrical installation

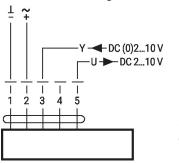

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data.

Direction of stroke switch factory setting: Actuator stem retracted (lacktriangle).

Functions

Functions with basic values (conventional mode)

Override control with AC 24 V with relay contacts

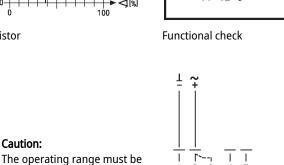

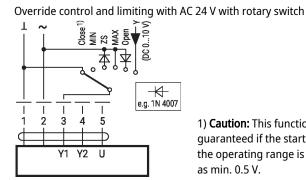

Minimum limit with positioner SG..

Control with 4...20 mA via external resistor

Y2

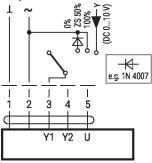

Y2 U

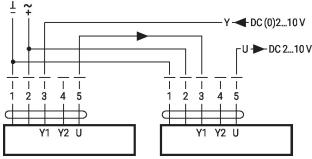

1) Caution: This function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

Override control with AC 24 V with Control remotely 0...100% with positioner SG.. rotary switch

1 2 3 4 SGA24 SGF24 SGE24

Primary/secondary operation (position-dependent)

Procedure

- 1. Apply 24 V to connection 1 and 2
- 2. Disconnect connection 3:
- with upwards direction of motion: closing point at top
- with downwards direction of motion: closing point at bottom
- 3. Short circuit connections 2 and 3:
- Actuator runs in the opposite direction

Functions with specific parameters (parametrisation necessary)

set to DC 2...10 V.

The 500 Ω resistor converts the

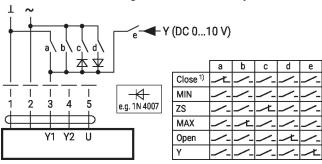

4...20 mA current signal to a

voltage signal DC 2...10 V

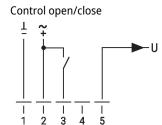

Override control and limiting with AC 24 V with relay contacts

♣ 4...20 mA

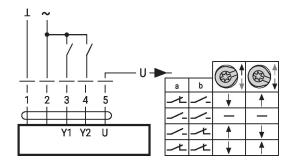

-DC 2...10 V

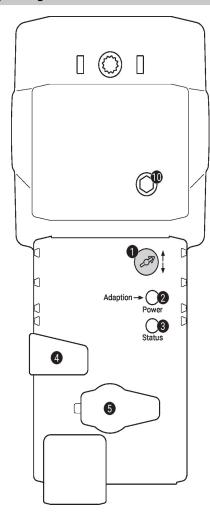

Control 3-point

Operating controls and indicators

1 Direction of stroke switch

Switch over: Direction of stroke changes

2 Push-button and LED display green

Off: No power supply or malfunction

On: In operation

Press Triggers stroke adaptation, followed by standard mode

button:

3 Push-button and LED display yellow

Off: Standard mode

On: Adaptation or synchronisation process active

Press No function

button:

4 Gear disengagement button

Press button: Gear disengages, motor stops, manual override possible

Release button: Gear engages, standard mode

5 Service plug

For connecting parametrisation and service tools

10 Manual override

Clockwise: Actuator stem extends
Counterclockwise: Actuator stem retracts

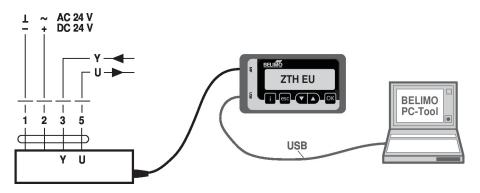

Service

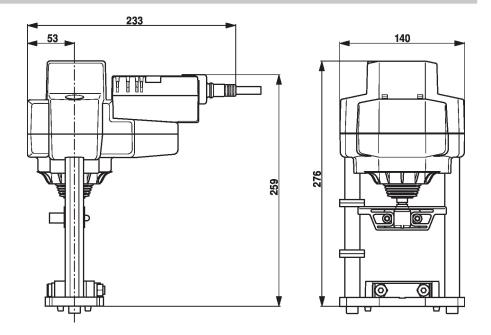

Service tools connection

The actuator can be parametrised by ZTH EU via the service socket. For an extended parametrisation the PC tool can be connected.

Connection ZTH EU / PC-Tool
