

Rotary actuators for ball valves

GMA..9E..

Electromotive rotary actuators with spring return for fail-safe function on 2-position, 3-position, and modulating control. Used on heating, ventilation, and air conditioning plants

- For 2-port and 3-port control ball valves, internally threaded connections (VAI61.. and VBI61..) or externally threaded connections (VAG61.. and VBG61..), DN15 to DN50.
- For open/close ball valves 2-port and changeover ball valves 3-port, internally threaded connections (VAI60.. and VBI60..) or externally threaded connections (VAG60.. and VBG60..), DN15 to DN50.
- Nominal torque 7 Nm
- GMA1..1.9E: Operating voltage AC 24 V / DC 24...48 V
- GMA161.9E/MO: Operating voltage AC 24 V / DC 24 V
- GMA321.9E: Operating voltage AC 230 V ~
- Positioning signal DC 0/2...10 V=
- GMA161.9E/MO: RS-485 for Modbus RTU communication
- Prewired with 0.9 m connecting cable

Features

- Brushless, robust DC motors ensure reliable operation regardless of load.
- The valve actuators do not require an end position switch, are overload proof, and remain in place upon reaching the end stop.
- The gears are maintenance free and low noise.
- Suitable for use with modulating (DC 0...10 V), 2-position or 3-position controllers.
- We recommend a minimum pulse length of 500 ms on rotary actuators operated with 3-point control to ensure continuous and accurate operation.
- On plants where the rotary actuator must move to the zero position (emergency position) during power failure.

Safety

⚠ CAUTION	
	<p>National safety regulations</p> <p>Failure to comply with national safety regulations may result in personal injury and property damage.</p> <ul style="list-style-type: none"> • Observe national provisions and comply with the appropriate safety regulations. • Mounting, commissioning, and service by properly trained personnel only.

Engineering

We recommend using temperature adapter ALJ100 in locations exposed to condensation to protect the actuator. Lubricate the adapter axle with silicon grease at medium temperatures $\leq 0\text{ }^{\circ}\text{C}$.

GMA161.9E/MO

The Modbus converter is designed for analog control at 0...10 V.

Mounting

Both ball valve and rotary actuator can be easily and directly assembled at the mounting location. No special tools or adjustments required.

Alignment

Installation

⚠ WARNING

No internal line protection for supply lines to external consumers

Risk of fire and injury due to short-circuits!

- Adapt the wire cross sections as per local regulations to the rated value of the installed fuse.

Commissioning

When commissioning the system, check both wiring and rotary actuator functions.

Maintenance

GMA..9E.. actuators are maintenance-free.

⚠WARNING

Tensioned return spring

Opening the drive housing can release the highly tensioned return spring, possibly resulting in injury due to flying parts.

- Do not open the drive housing.

The device is considered an electronic device for disposal in accordance with European guidelines and may not be disposed of as domestic waste.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Warranty service

The application-specific technical data is guaranteed only in combination with the Siemens products listed in the 'Device combinations' section. If third-party products are used, any guarantee provided by Siemens will be invalidated.
